Requests

www.tesla.com-Model3

https://www.tesla.com/configurator/api/v4/sesscheck

Description
This endpoint is used to perform an HTTP POST request to validate the session. The request should
include a payload with base configuration, effective date, name, product, updated date, trim options, and

referer. The response will have a status code of 200 and a content type of application/json. The response body will contain a JSON schema with keys for csrf_key and csrf_token.

Method
POST
URL
